SUMMARY

- Full stack developer with a natural talent and passion for front-end development, UI creation/design, and responsive design.
- JavaScript/ECMAScript 6 proficient and highly adaptable. React Framework with Redux and Router.
- Object Oriented Programming , Data Structures and Algorithms.

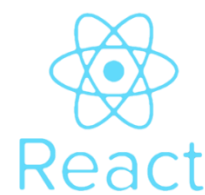

EDUCATION

Full Stack Development , Coding Dojo Seattle

05/2018 - 08/2018

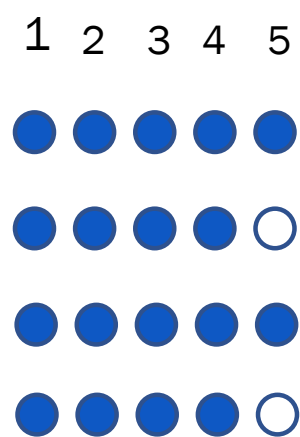

- Full Stack knowledge in C #/.Net, Python / Django, Java / Spring Boot
- Designed, built, and deployed large-scale applications (Bank App, Wedding Planning App, Book Rating App, Restaurant Finder App)
- Learned and Applied Object Oriented Programming, Data Structures and Algorithms on a daily basis.
- Developed and built front end with HTML5, CSS3, React, Bootstrap and AJAX.

TECHNICAL SKILLS

OBJECT ORIENTED PROGRAMMING
ALGORITHMS/DATA STRUCTURES

JAVASCRIPT/E6
CLOUD SOLUTIONS

WEB APP PROJECTS

Designed and Wrote Business Logic for a Content Idea Rating App

- Created an MVC project in Java that allows users to post ideas they have for content (Videos ,Music ,Stories ,Blogs etc) and allows the other user to like or dislike the idea.
- My Controller handles all the routing and logic of the objects and user input data.
- I Used Spring Tool Suite as my choice of IDE. Using Maven Dependencies.

Designed and Wrote Business Logic for an Environmental Task App

- Created an MVC project in Python that allows users to follow, message and send invites to other eco conscious users. Post up local environmental job events and join events posted by other users.
- Designed the sleek interface, color scheme and feel of the web page.
- The app has 25 users and is growing by 1% a week.

Designed and Wrote Business Logic for a music festival/locate your friends app.

- Created an MVC project in C# that allows users to check in into concerts and add themselves into a group with their friends.
- Used API to geo-locate users device and present a map of their friends in the concert vicinity
- Designed the interface and interactive dashboard. (User profile, Concert information, etc.)

PROFESSIONAL EXPERIENCE

09/2016 – 10/2017

Assistant Manager, Battle Town Paintball

- Supporting Manager in daily operations of paintball facility including opening and closing business, obligation to maintain system and be present.
- Provided customers with a safe and fun family environment for all occasions, practicing mindfulness and a big picture mentality.
- Responsible for equipment rentals and trained customers on proper use and safety of equipment, and daily transactions. Supervisor to 3 staff members. Maintained a daily routine for my team and kept an over view perspective of our objectives

03/2015 – 01/2016

Tech Assistant, Quality Cooling Systems

- Pick-ups and delivery of customer equipment orders which included air-conditioning units and filters.
- Assisted with maintenance of air-conditioning units for various clients, learning new technologies and operation systems constantly.
- Helped with tool inventory and record keeping, both manual and computerized. Assisted on monitoring and inspection of cooling systems to ensure continued proper operation.
